MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying unaudited condensed interim consolidated financial statements of Sigma Lithium Corporation (formerly Sigma Lithium Resources Corporation) (the "Company") are the responsibility of management and have been approved by the Board of Directors ("Board").

The unaudited condensed interim consolidated financial statements have been prepared by management in accordance with International Accounting Standards 34 Interim Financial Reporting of International Financial Reporting Standards as issued by the International Accounting Standards Board. When alternative accounting methods exist, management has chosen those it deems most appropriate in the circumstances. Financial statements are not exact since they include certain amounts based on estimates and judgments. Management has determined such amounts on a reasonable basis in order to ensure that the financial statements are presented fairly, in all material respects.

The Board is responsible for ensuring that management fulfills its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the financial statements. The Board carries out this responsibility principally through its Audit Committee.

The Audit Committee is appointed by the Board, and the majority of its members are independent directors. The Audit Committee meets at least four times a year with management, as well as the external auditors, to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues, to satisfy itself that each party is properly discharging its responsibilities, and to review the quarterly and the annual reports, the consolidated financial statements and the external auditors' reports. The Audit Committee reports its findings to the Board for consideration when approving the consolidated financial statements for issuance to the shareholders. The Audit Committee also considers, for review by the Board and approval by the shareholders, the engagement or reappointment of the external auditors.

1. Nature of operations

Sigma Lithium Corporation (formerly Sigma Lithium Resources Corporation) (the "Company") is a Canada based lithium exploration and development company incorporated under the Canada Business Corporations Act. The Company changed its name from Sigma Lithium Resources Corporation to Sigma Lithium Corporation on June 29, 2021 after receiving approval from shareholders at the Annual General Meeting. Its shares are listed on the TSX Venture Exchange (the "TSXV") under the symbol SGMA and on the American Stock Exchange Over-the-Counter QB under the symbol SGMLF. The head office of the Company is at Suite 2200, 885 West Georgia Street, Vancouver, British Columbia, V6E 3E8.

These unaudited condensed interim consolidated financial statements are presented in Canadian dollars and include the Company's wholly-owned subsidiary: Sigma Lithium Holdings Inc. ("Sigma Holdings"), which is domiciled in Canada and incorporated under the Business Corporations Act (British Columbia), and its indirect wholly-owned Brazil-incorporated subsidiary Sigma Mineração S.A. ("SMSA"). Sigma Holdings was incorporated for the purpose of developing SMSA's lithium properties located in the State of Minas Gerais, Brazil.

SMSA holds a 100% interest in four mineral properties: Grota do Cirilo, São Jose, Santa Clara and Genipapo, located in the municipalities of Araçuaí and Itinga, in the Vale do Jequitinhonha region in the State of Minas Gerais, Brazil (together, the "Lithium Properties").

2. Basis of preparation

These unaudited condensed interim consolidated financial statements have been prepared on a historical cost basis and are presented in Canadian Dollars except when otherwise indicated. They have been prepared on a going concern basis on the assumption that the Company will continue to operate for the next 12 (twelve) months and foreseeable future and be able to realize its assets and discharge its liabilities in the normal course of business.

As disclosed in note 13, the Company completed a non-brokered private placement in February 2021 with aggregate gross proceeds of \$42 million.

The Company has approximately \$40.6 million cash and cash equivalents available as at June 30, 2021. As described in note 3, the Company has decided to proceed with development activities in preparation for the construction of the commercial production plant at the Lithium Properties (the "Production Plant"). Although the Company has sufficient cash and cash equivalents to fund these development activities in the near-term, the Company has not yet committed to all expenditures related to the construction of the Production Plant. The Company will require additional debt financing when such long-term expenditures are committed in the future.

3. Significant Accounting Policies

Statement of compliance

The accounting policies and estimates applied in these condensed consolidated interim financial statements are consistent with those used in the Company's audited annual consolidated financial statements for the year ended December 31, 2020, except as described below. The Company applies International Financial Reporting Standards as issued by the International Accounting Standards Board. These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34 - Interim Financial Reporting. Accordingly, they do not contain all of the required disclosures and should be read in conjunction with the Company's December 31, 2020 audited annual consolidated financial statements.

3. Significant Accounting Policies (continued)

Adoption of a new accounting policy

Effective June 30, 2021, the Project's Xuxa deposit (the "Xuxa Mine") has transitioned from the exploration and evaluation stage (under IFRS 6) to the development stage and, as a result, \$22,516,500 of the exploration and evaluation expenditures were transferred from exploration and evaluation assets to property, plant, and equipment (IAS 16). An impairment test was performed using a lithium price of US\$ 750.00 per ton, an exchange rate of BRL 5.20/US\$1.00 and a discount rate of 8%, which resulted in no impairment. The Xuxa Mine forms part of the Grota do Cirilo cash generating unit that also includes assets in the exploration and evaluation stage. Judgement is required in determining when an asset transitions from the exploration and evaluation to the development stage.

Property, plant, and equipment

Work-in-progress

Assets under construction are capitalized as work-in-progress until the asset is available for use. The cost of work-in-progress comprises its purchase price and any costs directly attributable to bringing it into working condition for its intended use. Directly attributable costs are capitalized until the asset is in a location and condition necessary for operation as intended by management. These costs include: the purchase price, installation costs, site preparation costs, survey costs, freight charges, transportation insurance costs, duties, testing and preparation charges and estimated costs of dismantling and removing the item and restoring the site on which it is located.

Costs incurred on mineral properties in the development stage are included in the carrying amount of the development project in work-in-progress. Development stage expenditures are costs incurred to obtain access to proven and probable mineral reserves or mineral resources and provide facilities extracting, treating, gathering, transporting, and storing the minerals. All expenditures incurred during the development stage until when the asset is ready for its intended use are capitalized.

Work-in-progress is not depreciated. When an asset becomes available for use, its costs are transferred from work-in-progress into the appropriate asset classification such as mineral properties, buildings, machinery, fixture, and plant. Depreciation commences once the asset is complete and available for use.

7. Exploration and evaluation assets

The Company has deposits in exploration and evaluation stage with respect to its mineral properties and follows the practice of capitalizing all costs relating to the acquisition and exploration of mineral rights. Such costs include, among others, geological, geophysical studies, exploratory drilling and sampling, feasibility studies and technical reports.

A summary of explorations costs is set out below:

	June 30, 2021	December 31, 2020
Opening balance	\$ 18,354,148	\$ 19,388,092

Transfer to property, plant and equipment (Note 3 and 6)	(22,516,500)	-
Closing balance	\$ 3,203,346	\$ 18,354,148

^(a) The personnel costs include \$1,562,063 related to RSUs during the six months ended June 30, 2021 (year ended December 31, 2020 - \$470,032).

^(b) Environmental consulting relates to maintenance, monitoring and licensing services.

^(c) Environmental compensation relates to conditioning factors required by environmental authorities.

^(d) Cumulative translation adjustment is the result of the exchange gain arising on the translation of exploration and evaluation assets held at SMSA, whose functional currency is the Brazilian Real, as a result of the appreciation of the Brazilian Real relative to the Canadian dollar during the six month period ended June 30, 2021.

8. Revolving credit facility

On November 29, 2019, in order to fund its working capital, the Company entered into a US\$5,000,000 (\$6,300,000) unsecured revolving credit facility (the "A10 Credit Facility") with A10 Group (a related party – note 12). The A10 Credit Facility bears interest at 11% per annum, calculated in US Dollars from the day funds are drawn. The A10 Credit Facility was subject to a commitment and disbursement fee of 0.65% and a due diligence fee of 0.65% of the committed amount, which were offset against any interest payable on funds drawn. This credit facility had a one-year term, which was to be the repayment date for all funds drawn. Each draw on the A10 Credit Facility was subject to A10 Group approval.

On November 28, 2020 and on May 29, 2021 A10 Group agreed to extend the maturity date by six and three months, without any penalties or additional charges.

On May 31, 2021, the Company repaid US\$1,097,774 (\$1,330,579) to A10 Group.

On August 30, 2021, the Company repaid \$1,425,317 (US\$1,126,601) to A10 Group, being the outstanding balance of the A10 Credit Facility.

^(a) The amount in contractual currency was US\$962,850 (December 31, 2020 - US\$1,925,700)

^(b) The amount in contractual currency was US\$148,366 (December 31, 2020 – US\$179,634)

9. Deferred revenue

On March 26, 2019, the Company entered into a binding head of agreement with Mitsui & Co. Ltd. ("Mitsui") under which Mitsui will prepay the Company US\$30,000,000 for battery grade lithium concentrate supply of up to 80,000 tonnes annually (the "Mitsui Pre-Payment") over six years, extendable for another five years at the option of Mitsui.

An initial tranche payment of US\$3,000,000 (\$4,007,100) was received by the Company on April 4, 2019, while the disbursements of the remaining tranches are subject to certain conditions, including the execution of related definitive offtake agreements with Mitsui and securing loan funding for the remaining amount of the capital expenditures for the construction of the Production Plant.

As part of the total Mitsui Pre-Payment amount, for the Company to meet its construction timetable, an amount of up to US\$7,000,000 for the deposits required to purchase long lead items for construction of the commercial production plant or other preproduction critical activities, can be made available as per the Company's request to Mitsui. Such payments are subject to Mitsui's approval and will be credited towards the overall Mitsui Pre-Payment amount.

Other than the initial tranche payment described above, the Company did not request or receive any funds in 2020 and in the six month period ended June 30, 2021.
